

Overview

This map shows the main types of actors across the system at a high-level, grouped by their primary role. It was designed to give an overview of the scale and roles involved in the housing safety and quality system.

Accrediting

Shows how different roles receive professional accreditation or permission to do their jobs. Some roles may require qualifications accessed outside of the system shown e.g. university degrees.

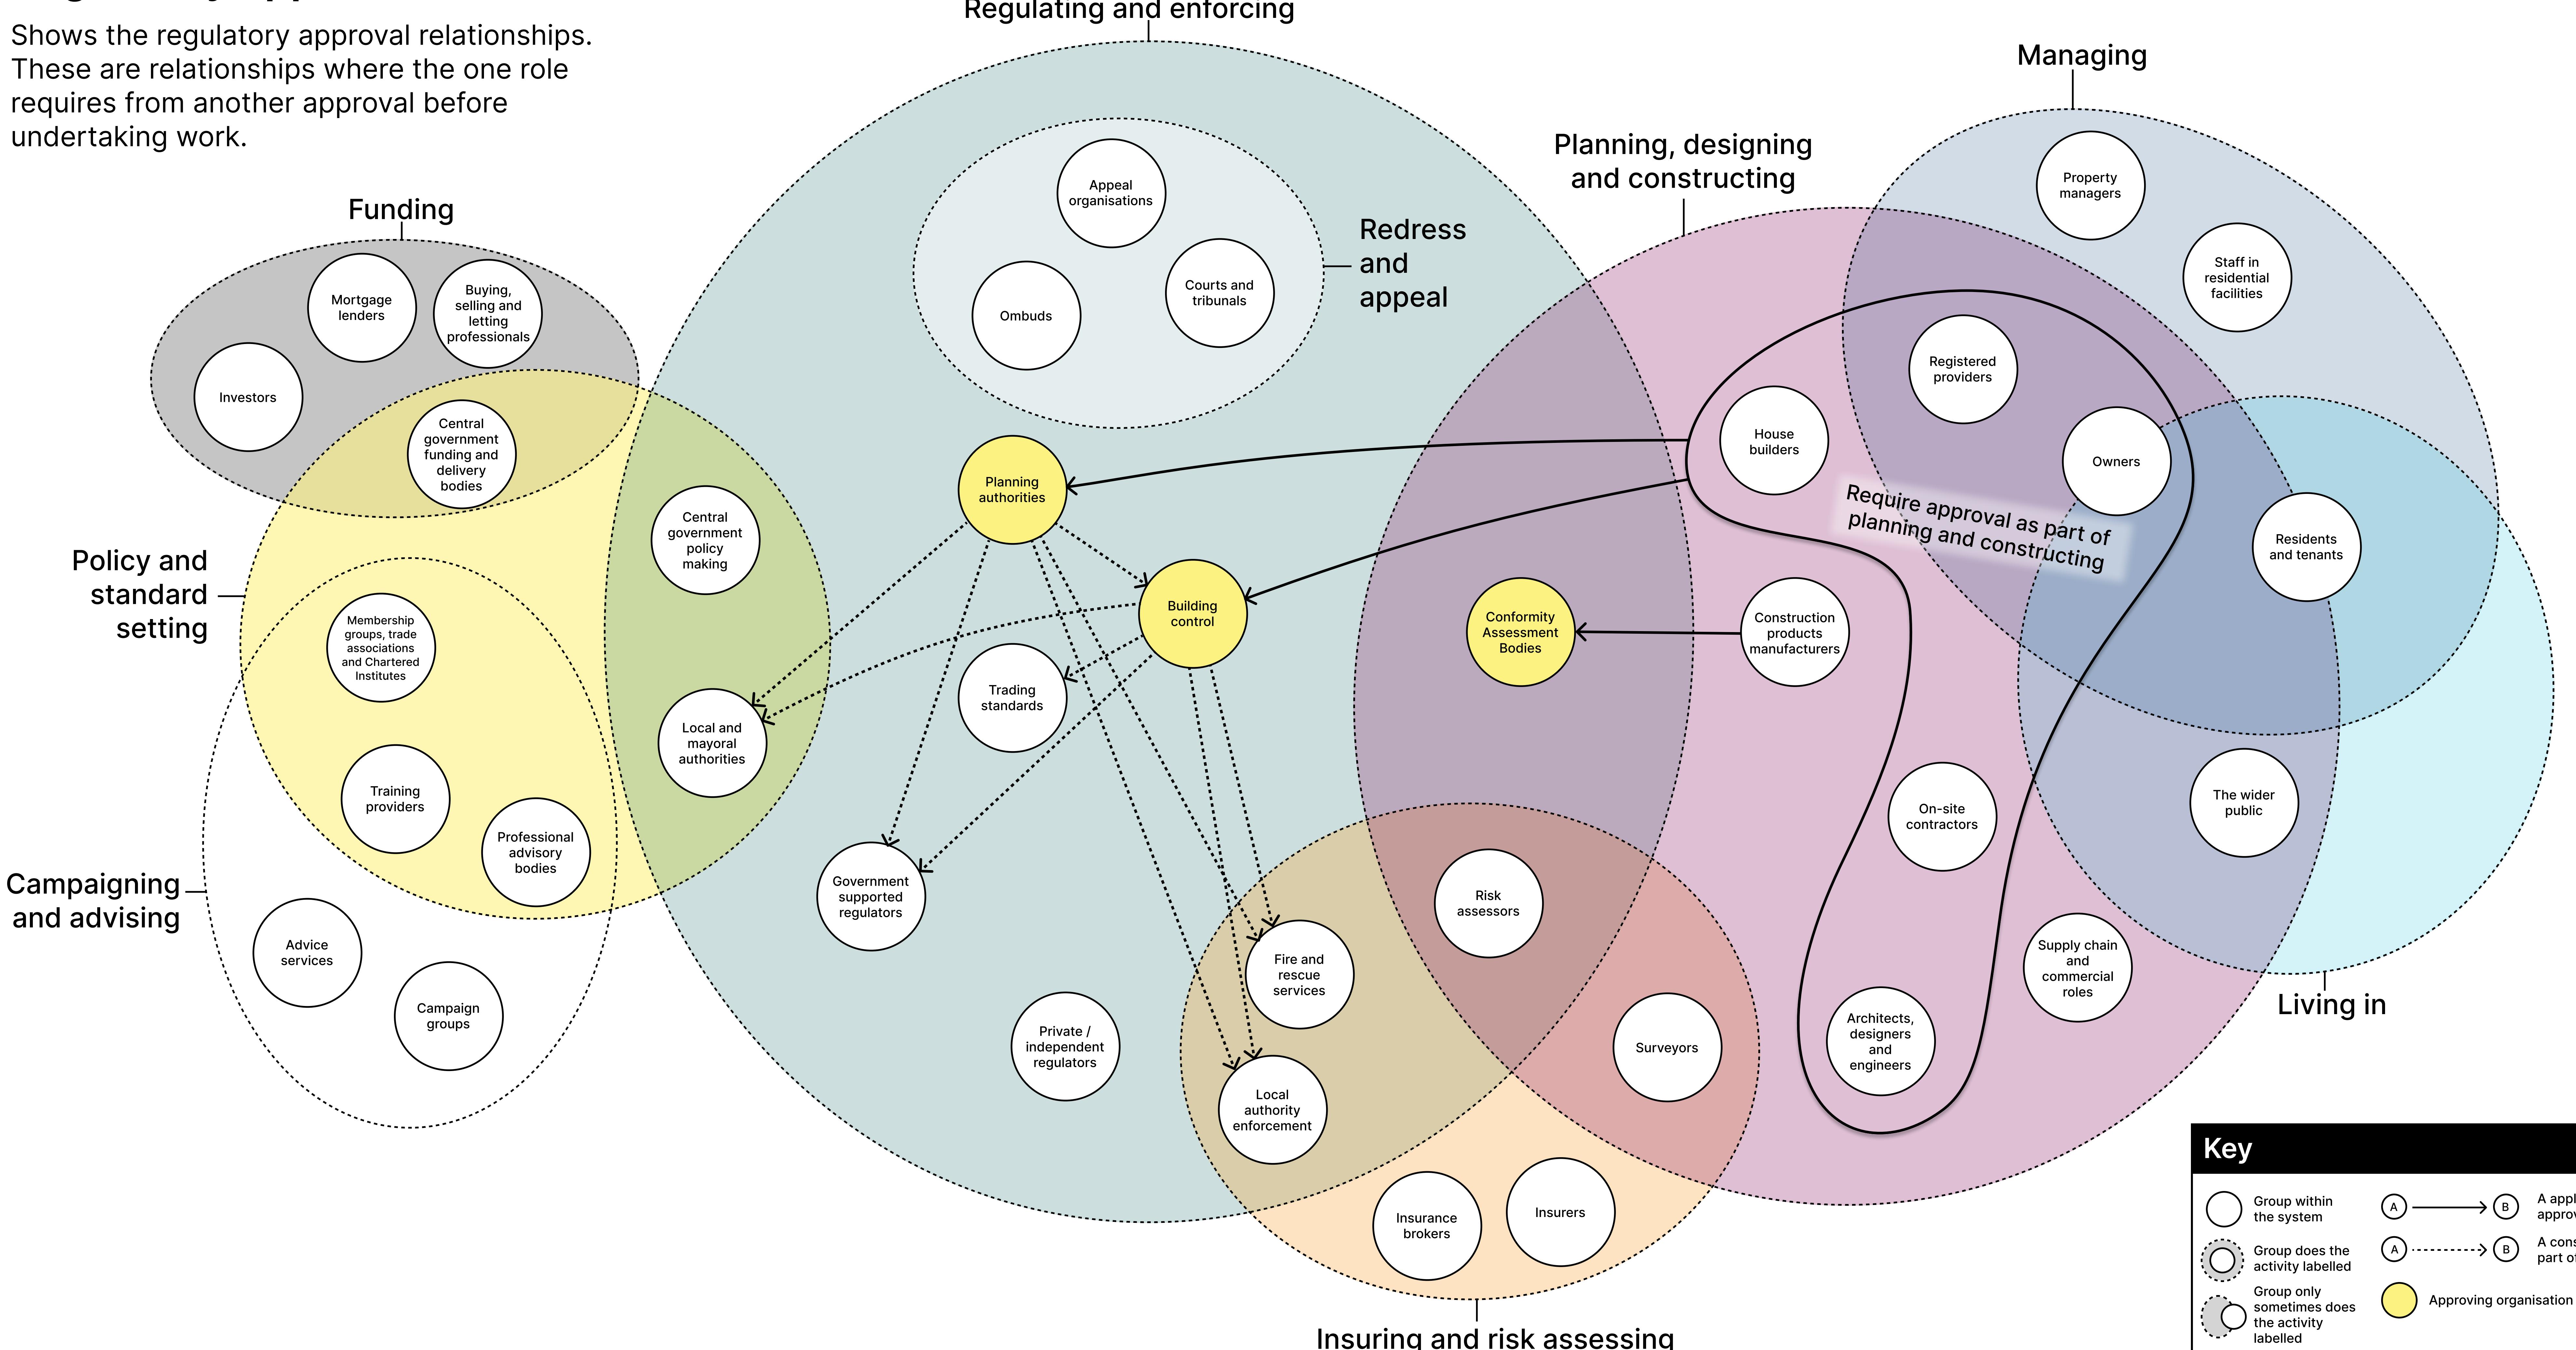

Key

- Group within the system
- Accredited by a government supported regulator
- Group does the activity labelled
- Accredited by a private or independent regulator
- Group only sometimes does the activity labelled

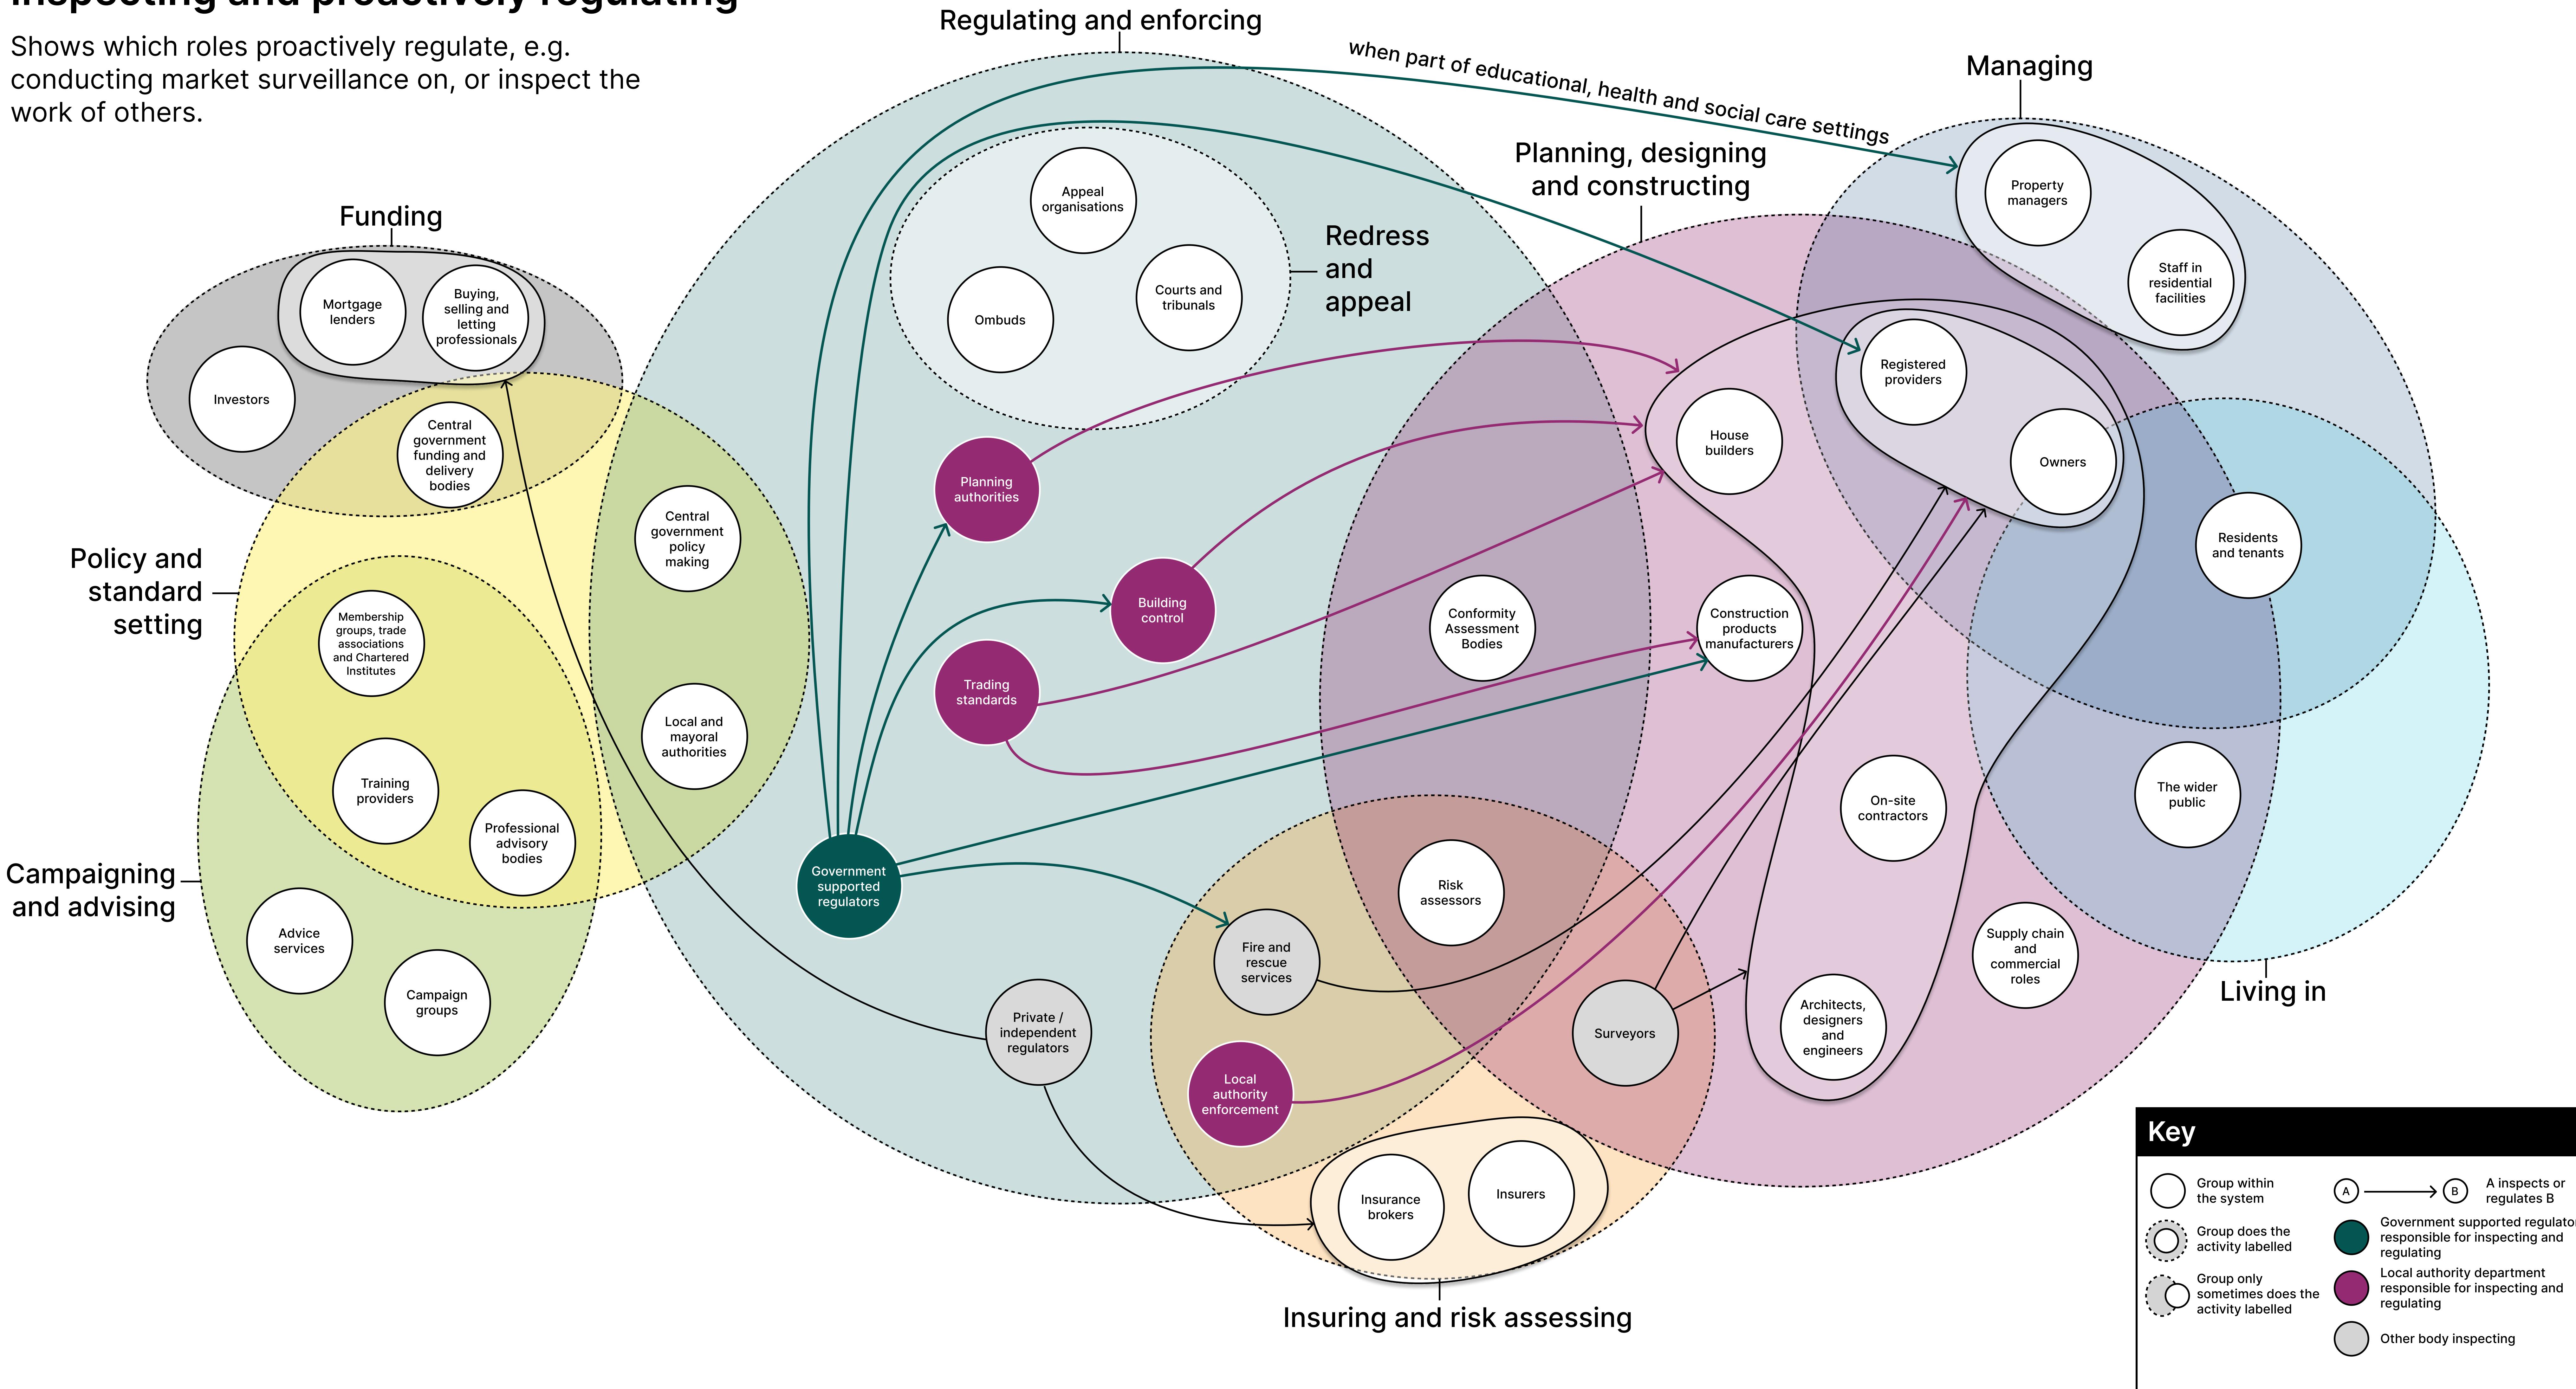

Regulatory approval

Shows the regulatory approval relationships.
These are relationships where the one role requires from another approval before undertaking work.

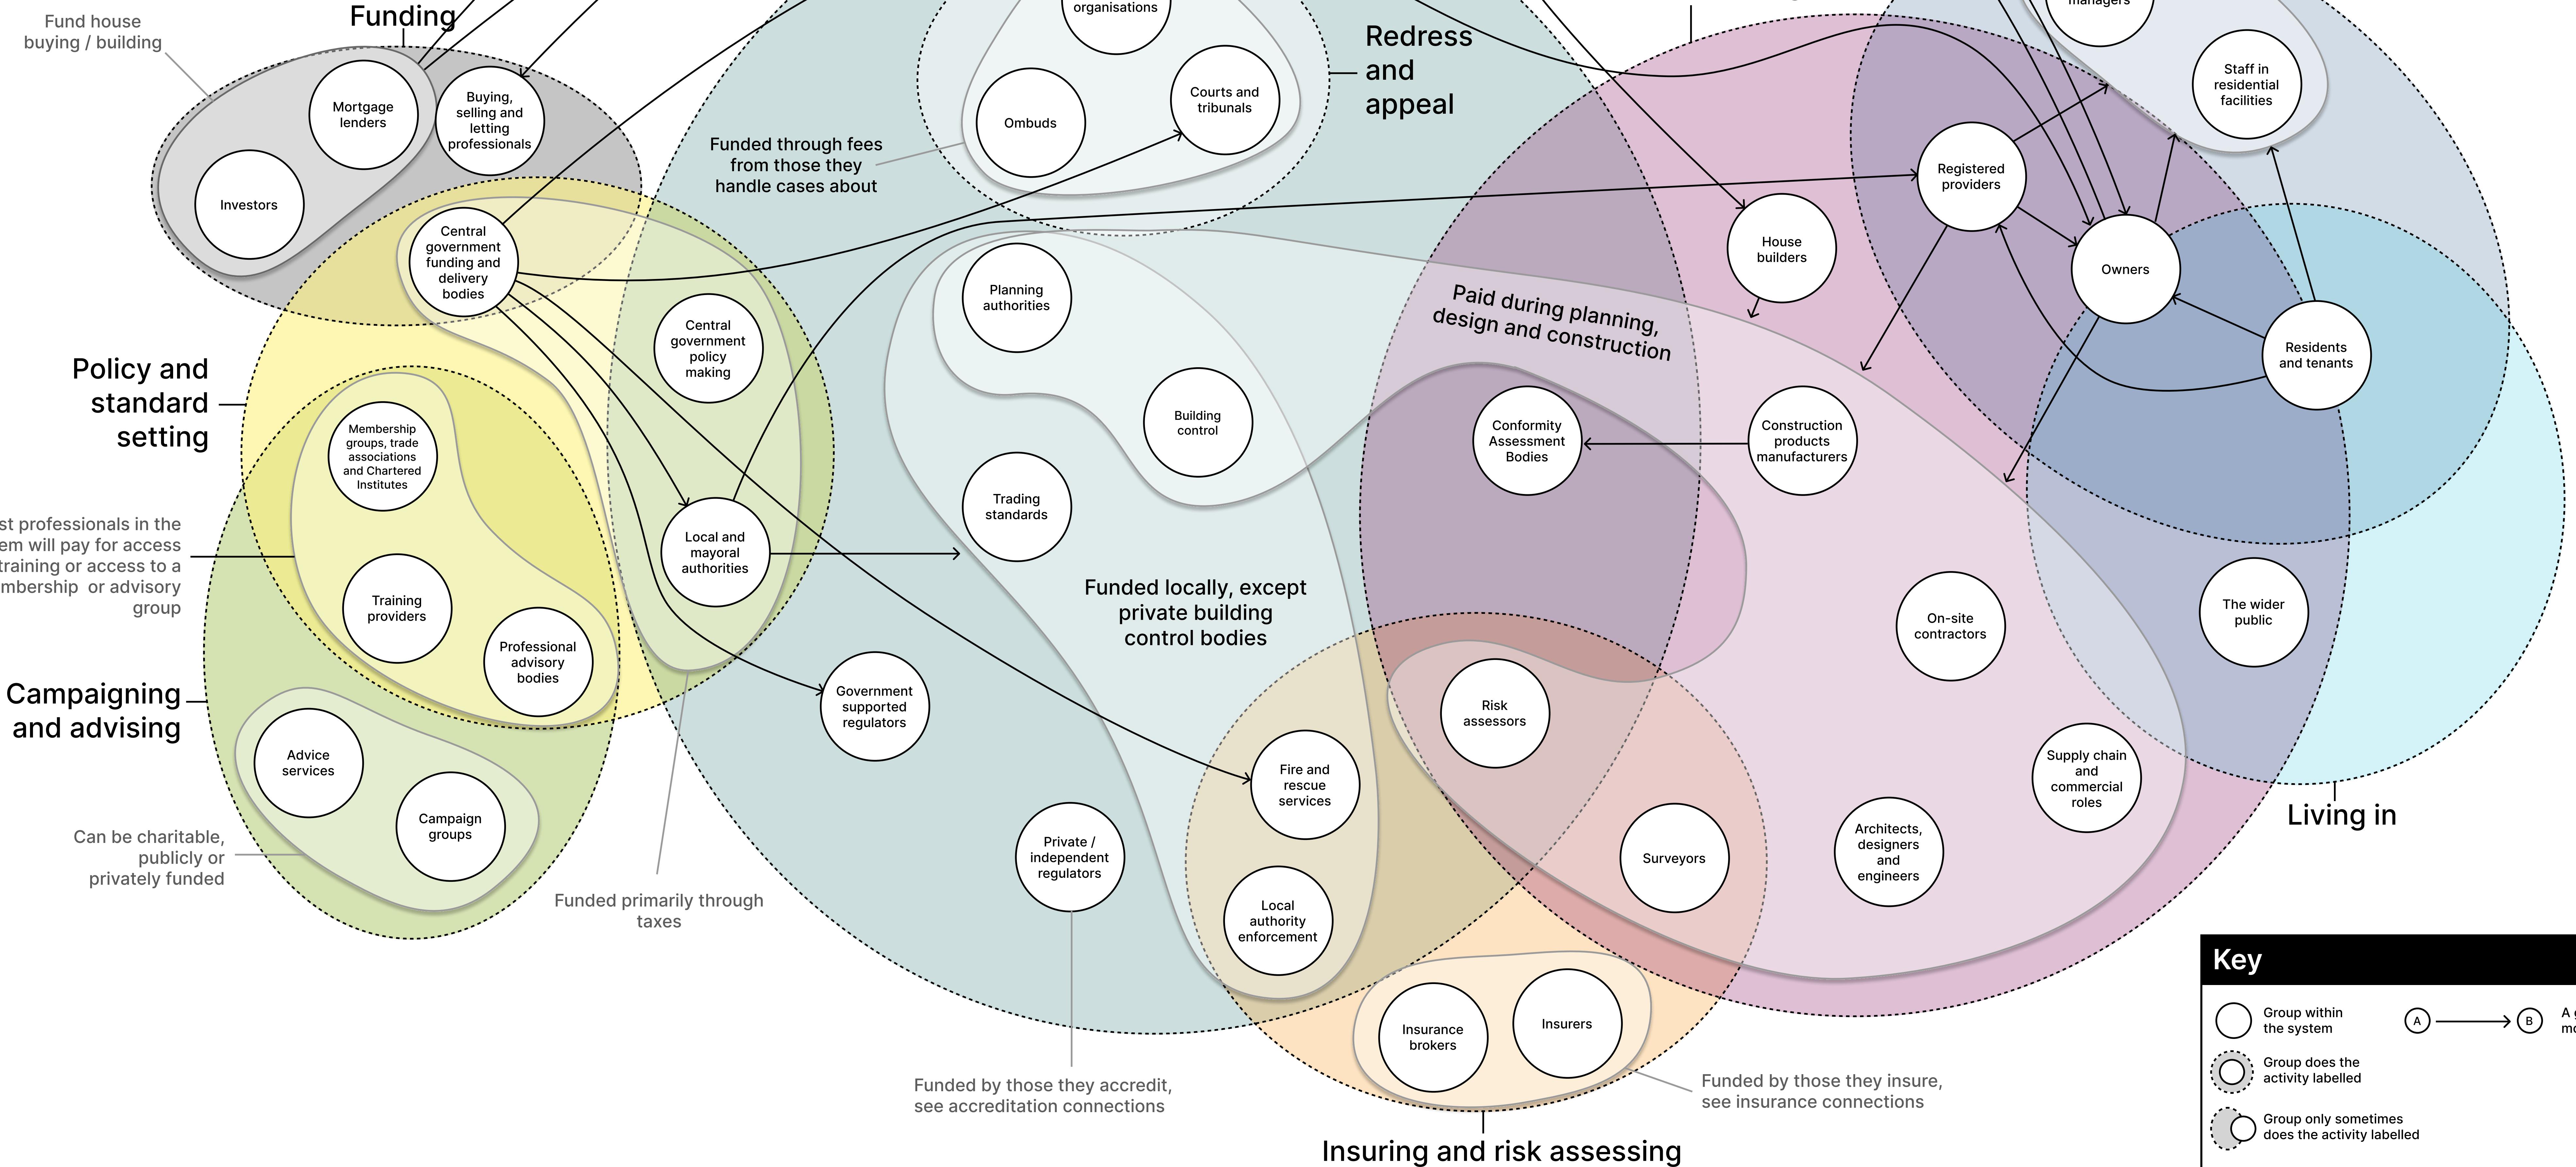

Inspecting and proactively regulating

Shows which roles proactively regulate, e.g. conducting market surveillance on, or inspect the work of others.

Paying and funding

Shows which actors pay for goods or services from others, and which fund activities at a high-level as financial relationships in this space are complex.

Key

Group within the system	A gives money to B
Group does the activity labelled	
Group only sometimes does the activity labelled	

Insuring

Shows the insuring relationships between actors, including those involved in both professional and home related insurance.
